Sample Questions with Answers and Explanations

To illustrate the depth and style of exam questions, here are some representative sample questions and their detailed answers:

Question 1: Installing Windows Server 2012

Q: You are installing Windows Server 2012 on a new server. You want to minimize the installation footprint and reduce updates required over time. Which installation option should you choose?

- A) Server with Desktop Experience
- B) Server Core
- C) Windows Server with GUI
- D) Nano Server

Answer: B) Server Core

Explanation:

Server Core is a minimal installation option that provides a smaller footprint, reduces attack surface, and requires fewer updates, making it ideal for roles that don't need a GUI. Nano Server is even more lightweight but is designed primarily for cloud environments and requires remote management. Therefore, for a standard minimal installation, Server Core is the best choice.

Question 2: Configuring Storage Spaces

Q: Which feature allows you to pool multiple physical disks into a single logical storage pool?

- A) Storage Replica
- B) Storage Spaces
- C) Data Deduplication

D) Disk Management

Answer: B) Storage Spaces

Explanation:

Storage Spaces enables pooling of physical disks into a storage pool, from which virtual disks are created to improve efficiency and flexibility. Storage Replica is used for disaster recovery; Data Deduplication reduces storage needs; Disk Management is a management tool but not a pooling feature.

Question 3: Configuring DHCP

Q: You need to assign IP addresses dynamically within a DHCP scope on Windows Server 2012. Which role must be installed?

A) Network Policy and Access Services

B) DHCP Server

C) Network Load Balancing

D) Routing and Remote Access

Answer: B) DHCP Server

Explanation:

The DHCP Server role is responsible for dynamically assigning IP addresses and related configuration parameters to clients within a network segment. Installing this role allows the server to act as a DHCP server.
