sacrificing scholarly rigor.

The Significance of 2002 in the Context of Economic Historiography

The early 2000s marked a period of renewed interest in the history of economic thought, driven by debates over the relevance of classical ideas in contemporary economics, the rise of behavioral economics, and the integration of heterodox perspectives. Landreth and Colander?s 2002 publication responded to these trends by providing a comprehensive narrative that contextualized modern economic theories within their historical evolution. It bridges the gap between traditional classical and neoclassical ideas and emerging heterodox approaches, emphasizing the dynamic, evolving nature of economic thought.

Overview of the Book?s Structure and Content

The book is organized into several key sections, each dedicated to different eras or schools of economic thought. This structure facilitates an understanding of how ideas developed over time and how they influenced subsequent theories.

Part I: Foundations of Economic Thought

This introductory part lays the groundwork by discussing the origins of economic inquiry, touching on early mercantilist ideas, physiocracy, and the classical school. It emphasizes the philosophical underpinnings of economics and introduces key figures such as Adam Smith, David Ricardo, and Thomas Malthus.

Part II: Classical Economics

Focusing on the classical school, this section explores the contributions of Adam Smith?s Wealth of Nations, Ricardo?s theory of rents, and Malthusian population dynamics. It discusses the development of the labor theory of value, the concept of comparative advantage, and the rise of free-market ideas.

Part III: The Marginal Revolution and Neo-Classical Economics

This pivotal section introduces the marginalist revolution, detailing the works of Jevons, Menger, and Walras. It explains how these thinkers shifted economic analysis from labor and cost-based theories to subjective marginal utility, leading to the neo-classical synthesis.

Part IV: The Evolution of Keynesian Economics

Addressing the 20th-century shift, this part discusses John Maynard Keynes?s revolutionary ideas,

especially his General Theory. It examines how Keynes challenged classical assumptions and laid the groundwork for macroeconomic policy.

Part V: Contemporary and Heterodox Economics

The final section considers post-World War II developments, including monetarism, new classical economics, behavioral economics, and institutional economics. It emphasizes the diversity of modern economic thought and the importance of pluralism.
