Ladies and gentlemen, teachers and fellow students,

Today, I stand before you to talk about a cause that affects us all ? the urgent need to protect our environment. Our planet, our home, is facing unprecedented challenges such as pollution, deforestation, and climate change. If we do not act now, future generations will inherit a world that is less hospitable and more dangerous.

Firstly, pollution from factories, vehicles, and improper waste disposal is damaging the air, water, and soil. This not only harms wildlife but also threatens our health. For example, increased respiratory problems are linked to air pollution in urban areas. We, as students, can contribute by reducing waste, recycling, and using eco-friendly transportation like bicycles or walking.

Lastly, climate change is perhaps the most alarming issue, causing rising sea levels and extreme weather patterns. It is crucial that we reduce our carbon footprint by conserving energy and advocating for renewable sources.

Lack of Personalized Feedback

Although answer explanations are provided, detailed feedback on essay structure, vocabulary use,

or pronunciation is limited. Integrating personalized feedback, possibly via AI or expert review, could enhance learning.

Potential Repetition of Content

Some test passages and questions may be reused or similar to previous modules, which can lead to familiarity rather than genuine skill development. Regular updates with new, diverse content are necessary.
